**A WBE Company**

## Family Built, Self Made Jim Shuster CFO

With over 40 years of experience in the earthmoving and blasting industries, Jim has worked on mining, construction and demolition projects since 1978. His work has carried him to 12 different states over the years and into many classrooms as an instructor of blasting recertification in Pennsylvania and Maryland. He is a member of the International, Keystone and Potomac chapters of the International Society of Explosive Engineers as well as serving as president of the Central Pennsylvania Association of Paving & Excavating Contractors.

## Who We Are

East Coast Access is the leader in providing safe, efficient, environmental compliant services for drilling, blasting, transmission line and substation construction, foundations, restoration and maintenance throughout North America.

East Coast Access is dedicated to providing safe, quality environmentally yielding and innovative construction, engineering and project management to our customers. Founded on family values and decades of experience, we strive to implement outstanding relationships with our clients, based on safety, quality, efficiency, integrity and anticipation of their needs. With our expanding services and teams, we continually provide safety, regulatory, quality and innovative training priding ourselves in offering our clients with premier service.

Over the past two years, East Coast Access has continually expanded its services to meet the needs of the industry. Founded on family values and more than four decades of blasting experience, we pride ourselves on the partnerships we have built among our teams and clients through the years.

## Safety is Our Core Value

- East Coast Access is uncompromising in our commitment to providing a safe work environment and a team that adheres to all safety compliances and regulations.
- ECA incorporates proactive safety and risk management systems to eliminate hazards on all our work sites. To achieve this, we create an environment that places the highest value on the health and safety of the employees, customers and communities.

## Project Safety Planning

- Successful projects begin with a formulated safety and regulatory plan. We have experienced and knowledgeable project managers and safety professionals executing and overseeing all projects, conducting job briefings prior to the start of each workday and when any conditions change.
- Each member of the crew, any visitors and/or sub contractors are briefed on our safety and regulatory plan and must sign-in on the job brief.

## Joining Our Team

As our work force continues to grow, East Coast Access takes initiative to ensure safety is communicated to all team members. We provide orientation programs and training that cover East Coast Access expectations for safe work practices as well as review all company safety policies and procedures. Our implementation of human performance and behavior-based safety culture equips our team members for success when they head into the field.

## Safety Evaluations

- East Coast Access implements a documented safety evaluation system along with weekly safety meetings to ensure our compliance for regulatory and safety processes and procedures. All levels of the organization are expected to be involved in the execution of this program to use any observations to expand on our existing safety culture and improve our project performance.
